BP. TECHNOLOGIES SOCIAL INNOVATIONS

- Has been committed to working with the SSA Administration to promote the active participation of the public workforce system in the Ticket to Work Program including becoming Employment Networks (ENs).
- It is incorrectly assumed that One-Stop Career Centers are serving only a small number of people with disabilities.

PARTNERING

- The DEI projects build on effective practices of the DPN initiative and other successful models to improve coordination among employment and training and asset development programs implemented at state and local levels, including SSA's Ticket to Work program, and build community partnerships that leverage public and private resources to better serve persons with disabilities and improve their employment outcomes.

COMPREHENSIVE SAFETY ANALYSIS 2010 (CSA 2010)
IS COMING SOON!

Will you be ready?

CSA 2010 changes the way FMCSA assesses and addresses commercial motor vehicle safety! Under CSA 2010, FMCSA evaluates carrier safety using all on-road performance data from roadside inspections and crash reports. All safety-based violations count, not only out-of-service or moving violations; inspections without safety violations count too! CSA 2010 addresses safety issues by contacting more carriers earlier so carriers can correct safety problems before crashes occur. Prepare today by staying informed! Visit csa2010.fmcsa.dot.gov and sign up to receive the latest news!
